

Please follow steps 9 and 11 closely so that the data is imported correctly.

1. Go to the property transfer tax statistics [webpage \(https://tax.vermont.gov/data-and-statistics/ptt\)](https://tax.vermont.gov/data-and-statistics/ptt) and select the "**View Weekly Public Property Transfer Data**" button.
2. This will open a new tab in your browser. From there, click into the "**Property Transfer Files/**."
3. Right-click on a period of sales data you want to see and select "**save link as**" to save the file on your computer.
4. Locate the "**Property Transfer Files/ Documentation/**" and click it to find the "**Property Transfer Files/ Documentation/Vermont-PTTR-Extract.XSD**". Right-click on this and select "**save link as**". This is your XML schema file that maps the XML tags to Excel. Once you have downloaded the schema, you will not have to do this again it is the same schema for all weeks of data.
5. Open a blank Excel workbook.
6. Go the developer tab and select "**Source**" under the "**XML**" grouping.
 - A. If you do not have the developer tab:
 - i. Go to "**File**" then "**Options**" at the bottom and select "**Customize Ribbon**."
 - ii. Under the "**Customize Ribbon**" and under Main Tabs, select the "**Developer**" check box and then "**OK**".
 - iii. After you save the tab, the "**Developer**" tab remains visible unless you clear the check box or have to reinstall a Microsoft 365 program.
7. On the bottom right hand in the "**XML Source**" section, click on "**XML Maps...**"
8. Select "**Add**" from here. Locate the XML Schema you saved in step 4. It should be called "**Vermont-PTTR-Extract**". Click open to add that as your XML map. Once that has loaded into the "**XML Maps**" screen, select "**OK**"
9. From the "**XML Source**" on the right side of the screen select the fourth file down titled "**formHeader**". This will select all of the fields associated with the PTT-172. Drag this selection over to cell A1.
10. Open another tab. This will be for the PTT-175 data, the additional buyers, and sellers.
11. From the "**XML Source**" on the right side of the screen select the fifth file down titled "**buyerSellerList**". Drag this selection over to cell A1.
12. NOTE: For steps 10 and 11, if you do not want all the fields provided, you can hand-select them, and only those fields will populate when you import the XML file.
13. From either tab in the Excel file, go back to the "**Developer**" tab and under the "**XML**" grouping select "**Import**".
14. Locate the XML file you saved from the webpage above. It should be titled "**PTYYYYMMDD_YYYYMMDD**." Select open after you have found the file. This will populate the Excel file with the raw data.
 - A. You may encounter a pop-up box stating there is an error. Most likely, there is no error; just converted the data to text.
